WINDOWS VERSION!

One thing that PC users are envious about is GarageBand. It is really among the best programs for music creation/recording with diverse functionality. Windows also has alternative: Mixcraft. But forget about that – it is too complicated and does not offer the same functions as GarageBand does! Luckily, now we have a downloader which downloads GarageBand 6.0.5 to your windows computer, installs it automatically and makes it available to use as it was on MAC! Really amazing tool and very easy to use. Just have in mind that the controls are the same as in MAC (e.g. close/minimize buttons on the left). Apart from that, everything runs smoothly!
