Pull the wall thermostat housing off of its wall mount plate. If the housing won't easily pull off, slide the housing up on the wall mount plate and then pull it off.. The battery of the thermostat keeps your programming saved and prevents your heating and cooling control system from turning off when the power goes out.. Honeywell offers home comfort, safety and energy efficiency solutions; thermostat, humidifier, ventilation, air cleaners, indoor air quality.

Programmable thermostats can be set to raise or lower the house temperature during specific times of the day to keep utility bills in check.. Change your wall thermostat batteries once a year, or when the low battery indicator appears on the digital display.. In manual mode, you set your own temperature, then leave the rest to the Networker.. Wall thermostats typically use AA or AAA alkaline batteries or 3V button-style lithium batteries.
